

_____ is proud to support 4R Nutrient Stewardship, a framework for fertilizer best management practices using the right nutrient source, at the right rate, the right time and in the right place. We support the goal of 4R Nutrient Stewardship to achieve economic, social and environmental performance objectives in relation to nutrient management and sustainable agricultural intensification. This includes many key contributing factors to sustainability such as profitability, soil health, reduced losses to the environment, rural development and food security, land conservation and habitat protection.

We recognize that in order to be sustainable, nutrient use must support cropping systems that provide economic, social, and environmental benefits. As such we support and agree to work toward the 4R Vision as explained in the 4R Strategic Plan, that all plant nutrients are applied using a measurable and recognized 4R nutrient stewardship framework, evidenced through better crop performance, improved soil health, and cleaner air and water.

As a 4R supporter _____ agrees to participate in ongoing 4R efforts including but not limited to becoming, and engaging as, a 4R Partner and reviewing the 4R Scorecard associated with the 4R Toolkit to determine where we may best engage.

We strongly encourage all TFI members, 4R Partners, and industry stakeholders that engage in this field to promote and showcase their support of 4R Nutrient Stewardship.
